

## **EndPlasticSoup – Cam Ranh, Vietnam: Plastic Museum & Experience Center**

**Total budget required: 40 K USD**

**Funding goal:** implementation the Plastic Museum & Experience Center.

### **Club donation examples:**

- **Silver:** 1,000 USD enables the purchase of equipment for recycling.
- **Gold:** 2,500 USD implements a recycling machine including support
- **Platinum:** 5,000 USD to implement a recycling machine including transportation and support, or the educational content for training, a site visit and support, extensions and/or education materials for schools.

### **Overview:**

- Set up Plastic Museum at Alma Resort, Cam Ranh.
- Purchase and installation recycling machines: shredder, extruder for moulding, press, laser cutter and moulds.
- Provide educational content for training and remote support.
- Site visit and support.
- Design, buy and implement information boards, posters, information materials.
- Design and provide workshop, and videos.
- Happy Green Vietnam education for children at public schools in the area.
- Office, consumables: desks, chairs, office materials, PPE protection gear, bins, signs, flyers.
- Extend shop and products.
- The Plastic Museum will offer regularly changing content to make it worthwhile to visit again and again. Students from universities in the region will be involved with the design and regular updates of the information and the workshops
- The Alma Resort will set up and manage the plastic museum, the visits, workshops and education materials for primary schools.
- The museum will be integrated with the Alma Science museum and the 'Alma Farm', a discovery camp for agriculture.
- Monthly cleanups with children and guests at the beach.

### **Impact:**

1. Awareness and understanding 'what you can do' through visits and workshop experience.
2. Lead by example: guests and visitors will gain awareness and will be enabled at home in the hotel and hotel area from examples like reusable bottles, bags, cups, and 'Bring Your Own' products from the shop.
3. inspiration for hotels, guests, local companies and authorities to reduce single use plastics, reduce waste, and improve waste management.
4. Awareness and clean beaches preventing plastic pollution from entering the ocean.

5. Education to children to become aware, become motivated for a zero-waste economy and inspire their parents toward less waste and a healthy life style.
6. Waste separation and composting to improve soil and enable growing local food at the Alma Farm.
7. This project will be an example for other hotels and regions in Indonesia and abroad.

The Plastic Museum and Experience Center in Cam Ranh, Vietnam ("Plastic Museum") aims to raise awareness about plastic pollution and solutions through an engaging and educational experience. Showcasing interactive information and innovative waste-management solutions, the Plastic Museum informs visitors of the impact of plastic waste and inspires what they can do themselves, both in Vietnam and at home. The Plastic Museum targets visitors from abroad and locally: guests of the Alma Resort and guests of the other hotel resorts in Cam Ranh, student and their family from local primary schools, and students from high schools and universities in the region. It is also meant to be an inspiration for hotels, guests and companies to reduce single use plastics, reduce waste, and improve waste management.
